Preface vii
Symposium Committees ix

Section I. Detectors

A generalized approach to designing specific-purpose Monte Carlo programs: a powerful simulation tool for radiation applications
Verghese, K. and R.P. Gardner 1
Neutron-burst detectors for cold-fusion experiments
Menlove, H.O. and M.C. Miller 10
Experience with position-sensitive neutron detectors at the Intense Pulsed Neutron Source
Crawford, R.K., J.R. Haumann, J.E. Epperson, P. Thiyagarajan, A.J. Schultz, G.P. Felcher, D.G. Montague and R.J. Dejus 17
A large-area neutron detector based on double scattering
Bonazzola, G.C., T. Bressani, D. Calvo, A. Feliciello, P. Gianotti, S. Marcello, M. Agnello and F. Iazzi 25
Neutron-chamber detectors and applications
Fehlau, P.E., H.F. Atwater and K.L. Coop 29
Neutron detection via long-range events resulting from fission in thick ^{238}U disks
August, R.A., G.W. Phillips and J.H. Cutchin 33
Detection-system characteristics using ^{252}Cf ionization chambers
Mihalczo, J.T., N.W. Hill, E.D. Blakeman and V.K. Paré 38
Improved yield of high resolution mercuric iodide gamma-ray spectrometers
Gerrish, V. and L. van den Berg 41
Use of thick HgI_2 detectors as intelligent spectrometers
Olmos, P., G. Garcia-Belmonte, J.M. Perez and J.C. Diaz 45
The scintillation properties of cerium-doped lanthanum fluoride
Moses, W.W. and S.E. Derenzo 51
Characterization of thallium bromide nuclear detectors
Shah, K.S., F. Olschner, L.P. Moy, J.C. Lund and M.R. Squillante 57
The Karlsruhe 4π barium fluoride detector
Wisshak, K., K. Guber, F. Käppeler and F. Voss 60
Flash X-ray measurements with a time projection Compton spectrometer
Baldwin, G.T., C.O. Landron, J.R. Lee, R.J. Leeper and L.J. Lorence, Jr. 66
The instrumentation of X-ray beam lines with PIN diode detectors
Jach, T. 76
A self-quenched streamer tube operated with Ne- and He-mixtures
Koori, N., A. Nohtomi, K. Yoshioka, T. Sakae, M. Matoba, Y. Uozumi and S. Widodo 80
Design of a Ge–NaI(Tl) Compton suppression spectrometer and its use in neutron activation analysis
Petra, M., G. Swift and S. Landsberger 85
A Cherenkov viewing device for used-fuel verification
Attas, E.M., J.D. Chen and G.J. Young 88
Theoretical ^{137}Cs γ-ray detection sensitivity curves calculated for silicon sensor devices
Jung, M., C. Teissier and P. Siffert 94

0168-9002/90/$03.50 © 1990 – Elsevier Science Publishers B.V. (North-Holland)

Comparison of calculated and measured response functions for germanium detectors
Moss, C.E. and J.R. Streetman 98
Position sensing with Ne-based gases in the SQS transition region
Uozumi, Y., H. Ijiri, S. Widodo, T. Sakae, N. Koori and M. Matoba 102
Analysis of mean lifetime for capture of neutrons in boron-loaded plastic scintillators
Kamykowski, E.A. 105
A ruggedized ZnS(Ag)/epoxy alpha scintillation detector
McElhaney, S.A., J.A. Ramsey, M.L. Bauer and M.M. Chiles 111
Timing performance of scintillators read out by silicon avalanche photodiodes
Carrier, C. and R. Lecomte 115
Evaluation of a photoelectron-rejecting alpha liquid-scintillation (PERALS) spectrometer for the measurement of alpha-emitting radionuclides
Cadieux, J.R. 119
A microscopic concept of the effects of radiation energy stored in defective crystals
Chuang, L.S. 123
Application of a logarithmic amplifier to a charge-division-type position-sensitive proportional counter
Mori, C., T. Suzuki, A. Uritani, T. Yamamoto, K. Yanagida, T. Watanabe and M. Yoshida ... 128
A focal-plane detector for the recoil-mass spectrometer of LNL
Guerrieri, A., G. Maron, G. Montagnoli, D.R. Napoli and G. Prete 133
Radiation damage studies of amorphous-silicon photodiode sensors for applications in radiotherapy X-ray imaging
Antonuk, L.E., J. Boudry, J. Yorkston, C.F. Wild, M.J. Longo and R.A. Street 143
A neutron spectrometer based on solid-state nuclear-track detectors
Balcázar, M., L. Tavera, M.E. Camacho and S. Alva 147
A position-sensitive radiation detector using a heterojunction of amorphous and crystalline silicon
Chiba, Y., I. Endo, M. Kubota, T. Ohsugi, S. Okada, S. Asai, Y. Hirata, Y. Kitano, T. Ohta, K. Seki, T. Yokoyama, M. Yabe and F. Takasaki 152
Lower bounds on scintillation detector timing performance
Clinthorne, N.H., A.O. Hero III, N.A. Petrick and W.L. Rogers 157
Development and testing of a new alpha radiac
Jacobus, J.P. and J.R. McNaughton 162
A logarithmic, large-solid-angle detector telescope for nuclear fragmentation
Kwiatkowski, K., K. Komisarcik, J.L. Wile, S.J. Yennello, D.E. Fields, V.E. Viola and B.G. Glagola 166
A new solid-state detector for radiation-therapy imaging
McGann, W.J., L. Cirignano, G. Entine and P. Biggs 172
Radiation damage resistance in mercuric iodide X-ray detectors
Patt, B.E., R.C. Dolin, T.M. Devore, J.M. Markakis, J.S. Iwanczyk, N. Dorri and J. Trombka .. 176
A Li-glass scintillation detector for thermal-neutron TOF measurements
Sakamoto, S. 182
A high-sensitivity, position-sensitive fission chamber for subcriticality measurements of spent fuel
Williams, J.A., J.T. Mihalczo, C.W. Ricker, F.L. Glesius and T.A. Kniss 187
Liquid-xenon detectors and their applications
Belli, P., R. Bernabei, S. d'Angelo, L. Andreanelli, F. Bronzini, A. Buccheri, A. Incicchitti and D. Prosperi 191
Studies of basic parameters of electron-counting detection
Harris, T.J., E. Mathieson, J.A. Mir and G.C. Smith 195
Nuclear spectroscopy with Si PIN diode detectors at room temperature
Ahmad, I., R.R. Betts, T. Happ, D.J. Henderson, F.L.H. Wolfs and A.H. Wuosmaa 201
Response of Si detectors to electrons, deuterons and alpha particles
Bauer, P. and G. Bortels 205

Monte Carlo simulation and first experimental results of a new X-ray detector using fluorescent optical fibres
Bourdinaud, M. and M. Laguesse 210
Glass fibers as radiation detectors
Hille, R., H. Bueker and F.W. Haesing 217
Introduction of a Well-type germanium/lithium semiconductor detector in nuclear medicine
De Vries, R.A., A. van de Wiel, J.J.M. Marx and M. de Bruin 222
The use of microdosimetric detectors combined with time-of-flight techniques
Schrewe, U.J., H.J. Brede, F. Langner and H. Schuhmacher 226
A novel position-sensing method using fast and slow components in the output signal from a proportional counter
Uritani, A., C. Mori, T. Watanabe and A. Miyahara 231
Gamma heating measurements with proportional counters
Chiu, H., E.F. Bennett and B.J. Micklich 234

Section II. Sources

Experimental results from high-intensity sources of monochromatic X-rays generated by 10–38 MeV protons
Avaldi, L., S. Bassi, M. Castiglioni, M. Milazzo, M. Silari and B. Weckermann 240
A progress report on a new, portable, water-cooled, rotating-anode X-ray tube with very small focus
Furnas Jr., T.C. 246
Laser plasmas as X-ray sources – two examples of recent work at KMS
Failor, B.H., E.F. Gabl, G.E. Busch, R.A. Bosch, G.L. Gerber and C.J. Armentrout 251
Development of intense, long-lived positron sources
Steiger, T.D., J. Stehr, H.C. Griffin, J.H. Rogers, M. Skalsey and J. Van House 255

Section III. Data acquisition

A Preloaded Filter for high-rate, high-resolution gamma spectrometry
Westphal, G.P. 261
A distributed data-acquisition system for gamma spectral analysis
Denton, M.M., S.R. Garcia and M.M. Minor 268
PC-based analysis of alpha-particle spectra
Chapman, T.C. 272
An automated microcomputer-controlled system for neutron activation and gamma-ray spectroscopy
Edward, J.B., P.A. Beeley, L.G.I. Bennett, A. Anderson and G.A. Burbidge 276
An n–γ pulse discrimination system for wide energy ranges
Zucker, M.S. and N. Tsoupas 281
An integrated pulse-analysis system for neutron spectroscopy
Miller, W.H. and K. McCollough 286
A VMEbus-based data-acquisition system for correlation-counting experiments
Janssen, H. 292
Radiation instrumentation with the microelectronical technique
Jiang, S.-H., M.-C. Horng and C.-I. Hsu 298

Section IV. Photon spectroscopy

Revision of the ANSI N42.14 performance standard for Ge gamma-ray spectrometry
Gehrke, R.J. 302
Analytical peak fitting for gamma-ray spectrum analysis with Ge detectors
Longoria, L.C., A.H. Naboulsi, P.W. Gray and T.D. MacMahon 308

Photopeak shape function: formulation based on stochastic event analysis and parameter estimation by the maximum-likelihood estimation method
Kishikawa, T. 313
Verification of gamma spectroscopy programs: a standardized approach
Koskelo, M.J. and M.T. Mercier 318
Analysis of multidimensional spectra: estimating the continuum
Griffin, H.C. and M.G. Chemaly 322
Applications of gamma-ray spectrometry in the quantitative nondestructive assay of special nuclear materials
Sampson, T.E. and J.L. Parker 327
The calibration of a low-energy photon germanium detector for use in the NAA k_0 standardization method
De Corte, F., M.C. Freitas and A. de Wispelaere 335
Coincidence summing corrections for positron emitters in germanium gamma spectrometry
Richardson, A.E. and W.W. Sallee 344
Comparison of photopeak integration methods
Kennedy, G. 349
An improved Si(Li) detector response function
He, T., R.P. Gardner and K. Verghese 354
Properties of high-energy photon fields to be applied for calibration purposes
Guldbakke, S. and D. Schäffler 367
New method for calibrating a Ge detector by using only zero to four efficiency points
Gunnink, R. 372

Section V. Basic physics

An axially symmetric gamma-ray backscatter system for DuMond spectrometry
MacKenzie, I.K. 377
Radioluminescence studies and radiation damage on single- and polycrystal CsI
Barnouin, O., A. Procoli, H. Chung and G.H. Miley 382
Thick-target γ-ray yields induced by 12 and 18 MeV ^{7}Li ions
Räisänen, J. 387
Chemical effects of L X-ray intensity ratios in niobium and molybdenum compounds
Iihara, J., C. Izawa, T. Omori and K. Yoshihara 394
Proton- and ^{4}He-ion-induced L-subshell ionization of rare-earth elements
Perillo, E., P. Cuzzocrea, N. De Cesare, F. Murolo, G. Spadaccini and M. Vigilante 399
Empirical cross sections for K X-ray emission by proton bombardment
Rosato, E. 403

Section VI. Facilities

Positron re-emission microscopy and its applications
Frieze, W.E., D.W. Gidley, A. Rich and J. Van House 409
Proposed neutron activation analysis facilities in the Advanced Neutron Source
Robinson, L., F.F. Dyer and J.F. Emery 413
The neutron microguide as a probe for materials analysis
Mildner, D.F.R. 416
A positron accumulator
Conti, R.S., B. Ghaffari and T.D. Steiger 420
A low-background gamma-ray assay laboratory for activation analysis
Lindstrom, R.M., D.J. Lindstrom, L.A. Slaback and J.K. Langland 425

Measurements in support of a neutron radiography facility for the SLOWPOKE-2 at RMC
Lewis, W.J., W.S. Andrews, L.G.I. Bennett and P.A. Beeley 430
Real-time neutron radiography at Texas A&M University
Reuscher, J.A., S.P. Midgett and J.W. Wright 434

Section VII. Imaging

New tomographic methods using X-ray tubes
Cesareo, R., S. Mascarenhas, S. Crestana and A. Castellano 440
A TNA explosives-detection system in airline baggage
Shea, P., T. Gozani and H. Bozorgmanesh 444
Some recent gauging applications
Verbinski, V.V., R.M. Polichar and J.H. Reed 449
An empirical fast-neutron technique for detection of explosive-like materials
Hussein, E.M.A., P.M. Lord and D.L. Bot 453
Design of an associated particle imaging system
Beyerle, A., J.P. Hurley and L. Tunnell 458
Nondestructive assay of fission products in spent-fuel assemblies using gamma and photoneutron activation
Lakosi, L. and Á. Veres 463
Computed tomography of radioactive objects and materials
Sawicka, B.D., R.V. Murphy, G. Tosello, P.W. Reynolds and T. Romaniszyn 468
Images obtained with a compact gamma camera
Bird, A.J. and D. Ramsden 480
Position estimation and error correction in a 2D position-sensitive NaI(Tl) detector
Kinahan, P.E. and J.S. Karp 484
A study of reconstruction algorithms and filters for an industrial X-ray tomography system
Seshadri, M.D., D.W. Miller, C.R. Pearsall and D.R. Campbell 490
Gamma-ray spectral imaging using a single-shutter radiation camera
DeVol, T.A., D.K. Wehe and G.F. Knoll 495
Multiple Compton scattering gamma ray imaging camera
Dogan, N., D.K. Wehe and G.F. Knoll 501
Radiation damage and electron lifetime measurements for liquid ionization chambers
Longo, M.J., L.E. Antonuk, L.H. Oesch and C.F. Wild 507
A real-time imaging system for rapid processing of radioactive DNA samples
McGann, W.J., L. McConchie and G. Entine 511
MCPT: A Monte Carlo code for simulation of photon transport in tomographic scanners
Prettyman, T.H., R.P. Gardner and K. Verghese 516
Spectral measurements of direct and scattered gamma radiation at a boiling-water reactor site
Block, R.C., I.L. Preiss, R.M. Ryan and G.J. Vargo 524
Scintillating fiber optics for X-ray radiation imaging
Shao, H., D.W. Miller and C.R. Pearsall 528
Region of interest tomography in industrial applications
Gentle, D.J. and N.M. Spyrou 534
An automated system for gamma radiation field mapping
Gould, R., J.E. Tarpinian and E.S. Kenney 538
Monte Carlo determination of emerging energy spectra for diagnostically realistic radiopharmaceutical distributions
Zubal, I.G., C.R. Harrell and P.D. Esser 544
Effect of noise, order and range in fitting the photopeak region of local, Anger-camera energy spectra
Wang, X., K.F. Koral, N.H. Clinthorne, W.L. Rogers, C.E. Floyd Jr. and R.J. Jaszczak 548

Gabor zone-plate apertures for imaging with the mercuric iodide gamma-ray camera
Patt, B.E., A. Meyyappan, A. Cai and G. Wade 554
A fast-neutron detector used in verification of the INF Treaty
Ewing, R.I. and K.W. Marlow 559

Section VIII. X-ray fluorescence

Quality assurance of fluorescence peak intensities in EDXRF analysis of environmental samples
Christensen, L.H. and K. Heydorn 562
A 2D imaging detector system for X-ray fluorescence analysis
Koike, M., I.H. Suzuki, S. Nakae and K.-I. Hasegawa 567
Pattern-recognition analysis of low-resolution X-ray fluorescence spectra
L.I. Yin and S.M. Seltzer 571
Determination of SO_2 in ambient air and in stacks of a tobacco curing plant using the XRF technique
Sumitra, T., S. Punnachaiya, N. Chankow and R. Laopaibul 578
An integrated system for quantitative EDXRF analysis based on fundamental parameters
He, F. and P. Van Espen 580

Section IX. Analytical applications

Analysis of submicrogram samples by INAA
Lindstrom, D.J. 584
Determination of the sampling factor in biological standards using INAA and PIXE analysis
Spyrou, N.M., A.S. Farooqi, W. Arshed and O.A. Akanle 589
Gamma-ray spectroscopy of implanted ^{7}Be and ^{22}Na for tribology studies
McHarris, Wm.C., M.L. Mallory, R.M. Ronningen, Y.X. Dardenne and H.J. Schock 593
Dual silicon surface-barrier detectors and associated electronics for monitoring chemical separation of ^{249}Cf and ^{249}Bk
Chiles, M.M. 597
An alpha autoradiographic technique for determination of ^{10}B concentrations in blood and tissue
Woollard, J.E., T.E. Blue, J.F. Curran, T.F. Mengers and R.F. Barth 600
Range profiles and thermal release of ^{3}He implanted into various nickel-based amorphous alloys
Ünlü, K. and D.H. Vincent 606
The development of a detection system for TDPAC studies of ^{75}Se
Mallion, S.N. and N.M. Spyrou 610
A Monte Carlo approach to X-ray attenuation corrections for proton-induced X-ray emission from particulate samples
Rees, L.B. 614
Prompt analysis of heavy elements by high-energy-induced (p, X) reactions
Pineda, C.A. and M. Peisach 618
Special applications of solvent-free solid support scintillation systems in the measurement of beta emitters
Skierkowski, P. 624
Analysis of radiolabelled thiocyanate tracer in oil field brines
Bjørnstad, T., E. Brendsdal, O.B. Michelsen and S.A. Rogde 629
An improved gammaspectrometric method for trace analysis of ^{22}Na
Bjørnstad, T. and S.A. Rogde 634

Section X. Bulk analysis

Development of nuclear techniques for on-line analysis in the coal industry
Sowerby, B.D. and J.S. Watt 642

Dynamic elemental analysis during thermal decomposition using X-ray attenuation
Maclenan, M.P., S.C. Oldham and P.F. Nolan 648
Optimization of in situ prompt gamma-ray analysis of lake water using a HPGe–^{252}Cf probe
Chao, J.-H. and C. Chung 651
Induced radioactivity from industrial radiation processing
Lone, M.A. 656
A gamma-radiographic study of wood and polymer combustion and the effects of flame retardants
Oldham, S.C., P.F. Nolan and M.P. Maclenan 661
The natural radioactivity in some Nigerian foodstuffs
Olomo, J.B. 666
A portable neutron device for void-fraction measurement in a small-diameter pipe
Waller, E.J. and E.M.A. Hussein 670
Investigation of an improved-sensitivity neutron-porosity oil-well logging tool
Oraby, M., K. Verghese and R.P. Gardner 674

Section XI. Environmental applications

Automated calculation of photon source emission from arbitrary mixtures of naturally radioactive heavy nuclides
Gosnell, T.B. 682
Gamma-spectrometric measurements of natural-radionuclide contents in soil and gamma dose rates in Yiangjiang, PR China
Luo Daling, Zhang Chunxiang, Guan Zujie, Lai Xian and Huang Guorong 687
Diurnal variations in a sealed radon chamber
Gilboy, W.B., P.R. James, C.P. Farmer and J.E. Beard 690
An easy-to-operate portable pulse-height analysis system for area monitoring with TEPC in radiation protection
Kunz, A., P. Pihet, E. Arend and H.G. Menzel 696
Electrochemically produced alumina-on-aluminium alloys as thermoluminescent dosimeter for gamma and electron dosimetry
Stenger, V., M. Osvay, Zs. Torday and Z. Papp 702

Author Index 709
